

Safety Policy

We will foster a culture where we respect and protect the safety of our employees, patients, customers and the environment.

We will always:

- Conduct our business to minimize the risks of adverse safety, health and environmental impacts.
- Encourage all personnel to share in the responsibility for a safe working environment.
- Follow Provincial, National and International safety regulations.
- Promote improvements in our processes through best safety practices, the implementation of our Industrial Management System (IMS) and the expertise of the Air Liquide Group.

Together, we will achieve our objective of zero accidents.

A handwritten signature in black ink, appearing to read "Franck Virey".

Franck Virey
President and CEO
